Education

Bachelor of Science in Information Technology 2022 – 2026
Technological University of the Philippines – Taguig
Cum Laude

Experience

Information Technology Intern Feb 2026 – May 2026
Vega Energy Services Corp.

- Vega Energy Audit System (VEAS): Built an end-to-end multi-agent LLM pipeline using Anthropic models, RAG (Hugging Face, pgvector), and automated PDF/DOCX exports to generate 10-section, DOE-compliant energy audit reports.
- Proposal & Quotation Builder: Developed a full-stack web system using React, Node.js, and Supabase to transform form inputs into custom-templated, client-facing PDF documents.

Technical Skills

Languages: JavaScript, TypeScript, Python, PHP, C, C++
Frameworks & Libraries: React, React Native, Node.js, Express, Laravel, Tailwind CSS
AI & Machine Learning: Retrieval-Augmented Generation (RAG), LLM Integration (Anthropic, Gemini), Prompt Engineering
Databases & Cloud: PostgreSQL, MongoDB, MySQL, Supabase, Firebase, Cloud SQL
Tools & Platforms: Git, GitHub, VS Code, Figma, Expo, Insomnia, Vercel, Google AI Studio

Projects

Mindful Map: Mood and Habits Analyzer for Emotional Regulation
Full-Stack Developer & Project Leader | **Tech Stack:** React, React Native, Node.js, Express, Python, MongoDB

- Led end-to-end development of cross-platform web and mobile apps for tracking daily moods, habits, and emotional patterns, deployed in partnership with Sto. Niño Catholic School Inc., Taguig City.
- Built a unified backend with Python analytics to evaluate habit-to-mood relationships, generate predictive trend insights, and deliver personalized emotional regulation feedback.

E-Commerce Websites & Mobile Applications
Full-Stack Developer | **Tech Stack:** React, React Native, Node.js, Express, MongoDB

- Developed full-stack e-commerce platforms featuring secure user authentication, real-time product management, and automated checkout workflows.
- Built responsive web interfaces and cross-platform mobile apps focused on high performance and streamlined user navigation.

Acadena: Decentralized Records System
Frontend Developer & Project Leader | **Tech Stack:** Internet Computer, Motoko, React

- Built a blockchain-based academic record management system on the Internet Computer to secure cross-institutional document verification and transfer workflows.
- Designed frontend interfaces and coordinated smart contract integration for tamper-proof document issuance and retrieval.

Certifications

Google: Introduction to AI Agents – DataCamp Jun 2026
Fundamentals of Machine Learning and AI – AWS May 2026
Introduction to Generative AI and Prompt Engineering – OpenLearning Sep 2025
